Your Stainless Steel Bolt and Nut Experts

NEWS

FASTENRIGHT NEWS | SEPTEMBER 2011

NEW PRODUCTS AVAILABLE

A new range of security fasteners has arrived!

More and more customers are enquiring about security fasteners which put a stop to vandalism and theft and we're happy to announce that we now carry the full range of stainless steel, **one-way self tapping screws**, as well as **countersunk and button head cap screws with torx-pin drive**, to give you peace of mind when fastening your products.

STAINLESS STEEL 'SECURITY' TORX-PIN CAP SCREWS

- Countersunk heads
- Button heads
- Security Torx Bits and Allen Keys available

STAINLESS STEEL BLIND RIVET NUTS

- Flat heads
- Countersunk heads (large and small)
- Various sizes

IMPORTANT TIP

Stainless steel fasteners tend to seize during assembling - this is called thread galling. Here are a few tips on how to reduce the risk of galling:

- slow down the installation rpm speed
- lubricate the threads with products like Gleitmo
- use different stainless steel grades for the bolt and nut (e.g. bolt: 304 and nut: 316)

EXCELLENCE IN STAINLESS STEEL
